Important
Products are identified in NuORDER by SEASON + STYLE NUMBER + COLOR
If you are changing the SEASON, STYLE NUMBER, or COLOR, you must first export your data to get the _ID field.
You must include the _ID field in your upload if you are changing the SEASON, STYLE NUMBER, or COLOR.
If you change the SEASON, STYLE NUMBER or COLOR without including the _ID, you will create duplicates of your products.
 If you are including the _ID field: new products must first be uploaded without the _ID column.

You only need to edit the Price1 field for the sizes that have a different price by size as shown above. The wholesale price remains the same in all sizes.

The NuOrder system will use the Price1 field by default if it has data, otherwise the price defaults to whatever is in the wholesale field.

2.4. Upload the save Excel .xlsx file

Simply drag and drop the file into the browser window on the area noted by NuOrder.

2.5. Confirm Price by Size is activated on the style.

Once a style has Price by Size on NuOrder, it will no longer show the prices in the style edit screena nd the products must be managed via Excel Download/Upload.
