In the NuOrder Sync Inventory option we have added the ability to use OTS for the inventory amounts.

Sync Inventory Screen

From the Sync inventory screen, you now have the ability to view details of Stock, WIP, Orders etc and your OTS so that you can confidently choose what stock you would like to sync with NuOrder.

Unlimited Stock

When reviewing the Sync Inventory screen, if you see styles listed as 'unlimited' in the NuOrder Stock Column, this means you have never synced any stock and have only exported the products to NuOrder.

By default, products that have no inventory synced are available to sell in unlimited QTY's. Meaning you can take orders for a specific delivery and would plan production for these orders.

IMPORTANT: Once you sync stock to a Style / Color, from that point on the NuOrder stock will be based on the QTY available or Zero if no stock is available.

To Sync Inventory from AIMS360 to NuOrder

1. Filter on any column

Using the OTS column in this example, we want to send only open units of 10 or more to NuOrder.

1. Click the = symbol at the top of the OTS Column and set the OTS column to filter on "Greater than or equal to"

2. type in the number 10 (or whatever is desired)

Now any style with 10+ units of available stock can be sent to NuOrder for sale

2. Select Stock to Sync

From this screen you can select the style/colors you wish to sync inventory.

1. Using the options at the top of the screen, you can select to sync a specific QTY or Percentage (%) of available stock.

- 2. The sync can be based on AIMS Stock or OTS as desired.
- 3. Be sure to press the Apply button to apply your selection as needed.

4. Once you make your selection(s), simple click the Sync Inventory from AIMS360 to NuOrder button in the lower right corner.

Sync Inventory from AIMS360 to NuOrder

۲

•

3. Sync Inventory Log

After you sync the inventory, you can check the inventory logfile to see each style that was selected for the specific batch process.

The screen will show you all style/colors selected and the QTY of inventory that was moved to NuOrder

NOTE: *it is recommended to view the logfile after each inventory sync to confirm the details are shown. If so, there should be no issue with the QTY's on your NuOrder site.*
